

Construction Products Regulation: EU (No) 305/2011

This Declaration has been drawn-up in accordance with Commission Delegated Regulation (EU) No. 574/2014 which amends Annex III of Regulation (EU) No 305/2011.

DECLARATION OF PERFORMANCE

No. E0085

1. Unique identification code of the product-type:

Model number and Description:

ORB-HT-11002-APO Orbis Class A2S Heat Detector with SensAlert and FasTest ORB-HT-11014-APO Orbis Class A2S Heat Detector with Flashing LED, SensAlert and FasTest

Approved Accessories:

Bases: ORB-MB-00001-APO,ORB-MB-00002-APO,ORB-DB-00003-APO,ORB-RB-10004-APO,ORB-MB-00012-APO,ORB-MB-00019-APO

Ancillary: ORB-BA-10008-APO Adaptor Base (to be used in conjunction with the following bases only 45681-200,45681-201)

Harmonised Product Type(s):

Heat Detectors - Point Detectors

2. Intended use/es:

Point detectors for use in fire detection and fire alarm systems installed in and around buildings

3. Manufacturer:

Apollo Fire Detectors Ltd, 36 Brookside Road, Havant, Hampshire, PO9 1JR, United Kingdom

4. Authorised representative:

Apollo Gesellschaft für Meldetechnologie mbH Am Anger 31 33332 Gütersloh Deutschland

5. System of AVCP

System 1

6a. Harmonised Standard(s)

EN 54-5:2017 + A1:2018

6b. Notified Body:

DBI Certification A/S (Notified Body 2531)

A HALMA COMPANY

20	1	30	3	13		
30		40	2	25		

Performance

Essential characteristics	Clauses in EN 54-5:2017/ A1:2018	Regulatory classes	Performance
Operational reliability:			
Position of heat sensitive element	4.2.1		The heat sensitive element(s) or at least part of it, except elements with auxiliary functions (e.g.characteristic correctors), are a distance ≥15mm from the mounting surface of the point heat detector.
Individual alarm indication	4.2.2	A2S	Category A2S The heat detector is provided with an integral red visual indicator and can remain identified until the alarm is reset. The visual indicator is visible from a distance of 6 m directly below the point heat detector, in an ambient light intensity up to 500 lx.
Connection of ancillary devices	4.2.3		Open or short circuit failures of connection to ancillary device do not prevent the correct operation of the detector
Monitoring of detachable point heat detectors	4.2.4		A fault condition is signaled when the detector is removed from the mounting base.
Manufacturer's adjustments	4.2.5		It is not possible to change the maufacture's settings expept by special means (e.g. a special code or tool, or by breaking or remove a seal).

		A2S: 20 K min ⁻¹ was not less than 1 min and did not
		exceed 30 s compared with the time obtained in 4.3.6
Vibration resistance		
Shock (operational)	4.6.4.1	No alarm or fault signal was given during the
		conditioning period or an additional 2 min.
		For specimen with a mass ≤ 4,75 kg:
		Shock pulse type: Half sine
		Pulse duration: 6 ms
		Peak acceleration: 10X (100-20M) ms-2 (M is specimen
		mass in Kg)
		Number of directions: 6
		Pulses per direction: 3
		i dises per direction.
		Response time at 3 K min ⁻¹ was not less than 7 min 13 s
		l '
		and did not exceed 2 min 40 s compared with the time
		obtained in 4.3.6.
		1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
		A2S: 20 K min ⁻¹ was not less than 1 min and did not
		exceed 30 s compared with the time obtained in 4.3.6
Impact (operational)	4.6.4.2	No alarm or fault signal was given during the
		conditioning period or an additional 2 min.
		Conditioning:
		Impact energy: 1,9 ±0,1 J
		Hammer velocity: 1,5 ±0,13 ms ⁻¹
		Number of impacts: 1
		Response time at 3 K min ⁻¹ was not less than 7 min 13 s
		and did not exceed 2 min 40 s compared with the time
		obtained in 4.3.6.
		Obtained in 4.5.0.

		A2S: 20 K min ⁻¹ was not less than 1 min and did not exceed 30 s compared with the time obtained in 4.3.6
Vibration, sinusoidal (operational)	4.6.4.3	No fault signal was given during the conditioning Conditioning: Frequency range: 10 to 150 Hz Acceleration amplitude: 5 ms ⁻² (≈0,5 g _n) Number of axes: 3 Sweep rate: 1 octave min ⁻¹ Number of sweep cycles: 1 per axis Response time at 3 K min ⁻¹ was not less than 7 min 13 s
		and did not exceed 2 min 40 s compared with the time obtained in 4.3.6. A2S: 20 K min ⁻¹ was not less than 1 min and did not exceed 30 s compared with the time obtained in 4.3.6
Vibration, sinusoidal (endurance)	4.6.4.4	No fault signal was given on reconnection attributable to the endurance conditioning. Conditioning: Frequency range: 10 to 150 Hz Acceleration amplitude: 10 ms⁻²(≈1,0 gn) Number of axes: 3 Sweep rate: 1 octave min⁻¹ Number of sweep cycles: 20 per axis Response time at 3 K min⁻¹ was not less than 7 min 13 s and did not exceed 2 min 40 s compared with the time obtained in 4.3.6. A2S: 20 K min⁻¹ was not less than 1 min and did not exceed 30 s compared with the time obtained in 4.3.6
Electrical stability EMC immunity (operational)	4.6.5	Compliance in EN 50130-4:2011 and No fault signal was given during the conditioning. Response time at 3 K min ⁻¹ was not less than 7 min 13 s and did not exceed 2 min 40 s compared with the time obtained in 4.3.6. A2S: 20 K min ⁻¹ was not less than 1 min and did not exceed 30 s compared with the time obtained in 4.3.6
