

CERTIFICATE OF CONSTANCY OF PERFORMANCE

Issued by DBI Certification, notified body No. 2531.

In compliance with *Regulation 305/2011/EU of the European Parliament and of the Council of 9 March 2011* (the Construction Products Regulation or CPR), this certificate applies to the construction product

55000-317 Series 65 Conventional Optical Smoke Detector

The product fulfils the essential characteristic:

See Annex 1

Intended use:

Applications related to automatic fire alarm systems

Placed on the market under the name or trade mark of:

Apollo Fire Detectors Ltd. 36 Brookside Road, Havant, Hampshire, P09 1JR United Kingdom

and produced in the manufacturing plant:

Apollo Fire Detectors Ltd. 36 Brookside Road, Havant, Hampshire, P09 1JR United Kingdom

This attests that all provisions concerning the performance described in Annex ZA of the standard(s)

EN 54-7:2018

Fire detection and fire alarm systems - Part 7: Smoke detectors - Point smoke detectors that operate using scattered light, transmitted light or ionization

under system 1 for the performance set out in this certificate are applied and that the factory production control conducted by the manufacturer is assessed to ensure the

CONSTANCY OF PERFORMANCE OF THE CONSTRUCTION PRODUCT.

:

This certificate was first issued on 2019-10-08 and will remain valid as long as neither the harmonised standard, the construction product, the AVCP methods nor the manufacturing conditions in the plant are modified significantly, unless suspended or withdrawn by the notified product certification body.

The attached annexes form part of this certificate.

Date of issue: 2023-04-14.

(This certificate supersedes the previous version of this certificate issued 2022-07-07)

Merete Poulsen Responsible for evaluation

Chris Ellis Responsible for certification decision

Annex 1

EXTENT

Type:

55000-317 Series 65 Conventional Optical Smoke Detector

Variant:

55000-317LIM (branded as Limotec)

Bases:

45681-200 Series 60/65 Mounting Base 45681-201 Series 60/65 Diode Mounting Base 45681-245 Series 65 Relay Mounting Base 45681-246 Series 65 Auxiliary Mounting Base 45681-247 Series 65 EOL 12 Volt Mounting Base 45681-248 Series 65 EOL 24 Volt Mounting Base

Performance

Essential characteristics	Clauses in EN 54-7:2018	Regulatory classes	Performance
Operational reliability:			
Individual alarm indication	4.2.1		The visual indicator(s) are visible from a distance of 6 m in an ambient light intensity up to 500 lx.
Connection of ancillary devices	4.2.2		Open or short circuit failures of connection to ancillary device did not prevent the correct operation of the detector
Monitoring of detachable detectors	4.2.3		A fault condition is signaled when the detector is removed from the mounting base.
Manufacturer's adjustments	4.2.4	None	It is not possible to adjust the detector settings without the use of a special tool to access into the detector or use of a code to enabling entry into the panel programming software.
On site adjustment of response behavior	4.2.5		The mode(s) of operation are adjustable from the Control and Indicating Equipment by use of a loop communication protocol. Access to enable mode changes is by software control of the protocol communication.
Protection against the ingress of foreign bodies	4.2.6		The chamber is designed so that a sphere of diameter (1,3±0,05) mm cannot pass into the sensor chamber.
Response to slowly developing fires	4.2.7		The provision of "drift compensation" (e.g. to compensate for sensor drift due to the build-up of dirt in the detector), does not lead to a significant reduction in the

			detectors sensitivity to slowly
			developing fires.
Software controlled detectors (when provided)	4.2.8		The software documentation and
			the software design complies
			with the requirements of EN 54- 7:2018.
Nominal activation conditions/sensitivity:			7.2018.
Repeatability	4.3.1	_	Ratio of response values
			$m_{max}:m_{min} \leq 1.6$
			Lower response value, m _{max} :m _{min}
		_	≥ 0.05 dB m ⁻¹
Directional dependence	4.3.2		Ratio of response values
			m _{max} :m _{min} ≤ 1.6 Lower response value, m _{max} :m _{min}
			\geq 0.05 dB m ⁻¹
-Reproducibility	4.3.3		Ratio of response values m _{max} :m
			<u><</u> 1.33
			Ratio of the response values
			m: m _{min} ≤ 1.5
			Lower response value, m _{min} > 0.05 dB m ⁻¹
Response delay (response time):			0.05 00 11
Air movement	4.4.1		Ratio is > 0.0625 and < 1.60 and the point smoke detector did
			not emit a fault nor alarm signal
			during the test with aerosol-free
			air
Dazzling	4.4.2		The specimen did not emit
			neither an alarm nor a fault
			signal and Ratio of response
			thresholds m _{max} :m _{min} ≤ 1.6
Tolerance to supply voltage:		Threshold	
Variation in supply parameters	4.5		Ratio of response values
			m _{max} :m _{min} < 1.6
			Lower response value, $m_{min} \ge 0.05 \text{ dB} \text{ mms}^{-1}$
Performance parameters under fire conditions:		-	0.05 dB m ⁻¹
Fire sensitivity	4.6	_	Evaluated as meeting the
			requirements of TF2 toTF5
Durability of nominal activation			
conditions/Sensitivity:		_	
temperature resistance		_	
Cold (operational)	4.7.1.1		The specimen did not emit neither an alarm nor a fault
			signal and Ratio of response
			values $m_{max}:m_{min} \le 1.6$
Dry heat (operational)	4.7.1.2	7	The specimen did not emit
			neither an alarm nor a fault
			signal and Ratio of response
Humidity resistance			values m _{max} :m _{min} < 1.6
Humidity resistance Damp heat, steady-state (operational)	4.7.2.1		The specimen did not emit
Dump near, steady-state (operational)	7.7.2.1		neither an alarm nor a fault
			signal and ratio of response
			values m _{max} :m _{min} <u><</u> 1.6
Damp heat, steady-state (endurance)	4.7.2.2		No fault signal, attributable to
			the endurance conditioning was
			given on reconnection of the

DBI Certification A/S Jernholmen 12, 2650 Hvidovre Tlf.: 36 34 90 90

		specimen and Ratio of response
		values $m_{max}:m_{min} \le 1.6$
Corrosion resistance		
Sulphur dioxide (SO ₂) corrosion (endurance)	4.7.3	No fault signal, attributable to the endurance conditioning was given on reconnection of the specimen and Ratio of response values $m_{max}:m_{min} \leq 1.6$
Vibration resistance		
Shock (operational)	4.7.4.1	No fault signal given from the specimen during the conditioning period or the additional 2 min. and Ratio of response values $m_{max}:m_{min} \leq 1.6$
Impact (operational)	4.7.4.2	No fault signal given from the specimen during the conditioning period or the additional 2 min. and Ratio of response values $m_{max}:m_{min} \leq 1.6$
Vibration, sinusoidal (operational)	4.7.4.3	No fault signal given from the specimen during the conditioning and Ratio of response values $m_{max}:m_{min} \leq 1.6$
Vibration, sinusoidal (endurance)	4.7.4.4	No fault signal, attributable to the endurance conditioning was given on reconnection of the specimen and Ratio of response values $m_{max}:m_{min} \leq 1.6$
Electrical stability EMC immunity (operational)	4.7.5	
a) Electrostatic discharge (operational)		
b) Radiated electromagnetic fields (operational)		No alarm or fault signal given during the conditioning and Ratio
c) Conducted disturbances(operational)		of response values m _{max} :m _{min} ≤ 1.6
d) Fast transient bursts (operational)		
e) Slow high energy voltage surge (operational)
